

Stock Analysis Report

Date: 31/07/2024 17:07:44

Data Analysis:

This report presents an analysis of stock data for the following stocks: IBM, TSLA, and MSFT. The data includes historical transactions, current prices, and quantities for each stock.

Summary of Transactions:

Stock	Total Quantity	Total Buy	Total Sell
---	---	---	---
IBM	56	44	12
TSLA	10	10	0
MSFT	19	12	7

Current Stock Prices and Quantities:

Stock	Current Price	Quantity
---	---	---
IBM	191.75	32
TSLA	219	10
MSFT	403.21	4

Analysis:

IBM:

IBM has been actively traded, with a significant number of buy and sell transactions. The current price of IBM is 191.75, and the total quantity held is 32.

TSLA:

TSLA has only been purchased, with no sell transactions. The current price of TSLA is 219, and the total quantity held is 10.

MSFT:

MSFT has also been actively traded, but with more sell transactions than buy transactions. The current price of MSFT is 403.21, and the total quantity held is 4.

Strategies:

Based on the analysis of the current stock data, the following strategies are recommended:

IBM: Consider holding or buying more IBM shares, as the stock has been performing well and has a positive outlook.

TSLA: Continue holding TSLA shares, as the stock has a strong growth potential.

MSFT: Re-evaluate the investment strategy for MSFT, as the stock has been underperforming recently. Consider selling some shares or diversifying the portfolio.
